As part of how we measure our results, we use certain non-GAAP financial measures to ascertain performance. These non-GAAP financial measures are reconciled in the section labeled "Metrics and non-GAAP financial reconciliation" at the end of this press release.

Total unfunded commitments subject to the reserve as of March 31, 2020 were $\$ 596.1$ million. This includes a $\$ 105.3$ million increase in unsettled liquid credit balances at the end of the period that created approximately $\$ 1.6$ million of credit expense for the quarter.

This press release contains forward-looking statements. Any statements about our expectations, beliefs, plans, predictions, forecasts, objectives, assumptions or future events or performance are not historical facts and may be forward-looking. You can identify forward-looking statements by the use of forward-looking terminology such as "believes," "expects," "could," "may," "will," "should," "seeks," "likely," "intends," "plans," "pro forma," "projects," "estimates" or "anticipates" or the negative of these words and phrases or similar words or phrases that are predictions of or indicate future events or trends and that do not relate solely to historical matters. Forward-looking statements depend on assumptions, data or methods that may be incorrect or imprecise and we may not be able to realize them. We do not guarantee that the transactions and events described will happen as described (or that they will happen at all). The following factors, among others, could cause actual results and future events to differ materially from those set forth or contemplated in the forward-looking statements: business and economic conditions generally and in the bank and non-bank financial services industries, nationally and within our local market areas; the impact of COVID-19 on our business, including the impact of the actions taken by governmental authorities to try and contain the virus or address the impact of the virus on the United States economy (including, without limitation, the CARES Act), and the resulting effect of all of such items on our operations, liquidity and capital position, and on the financial condition of our borrowers and other customers; our ability to mitigate our risk exposures; our ability to maintain our historical earnings trends; changes in management personnel; interest rate risk; concentration of our products and services in the transportation industry; credit risk associated with our loan portfolio; lack of seasoning in our loan portfolio; deteriorating asset quality and higher loan charge-offs; time and effort necessary to resolve nonperforming assets; inaccuracy of the assumptions and estimates we make in establishing reserves for probable loan losses and other estimates; risks related to the integration of acquired businesses and any future acquisitions; our ability to successfully identify and address the risks associated with our possible future acquisitions, and the risks that our prior and possible future acquisitions make it more difficult for investors to evaluate our business, financial condition and results of operations, and impairs our ability to accurately forecast our future performance; lack of liquidity; fluctuations in the fair value and liquidity of the securities we hold for sale; impairment of investment securities, goodwill, other intangible assets or deferred tax assets; our risk management strategies; environmental liability associated with our lending activities; increased competition in the bank and non-bank financial services industries, nationally, regionally or locally, which may adversely affect pricing and terms; the accuracy of our financial statements and related disclosures; material weaknesses in our internal control over financial reporting; system failures or failures to prevent breaches of our network security; the institution and outcome of litigation and other legal proceedings against us or to which we become subject; changes in carry-forwards of net operating losses; changes in federal tax law or policy; the impact of recent and future legislative and regulatory changes, including changes in banking, securities and tax laws and regulations, such as the Dodd-Frank Wall Street Reform
and Consumer Protection Act (the "Dodd-Frank Act") and their application by our regulators; governmental monetary and fiscal policies; changes in the scope and cost of FDIC, insurance and other coverages; failure to receive regulatory approval for future acquisitions; and increases in our capital requirements.

While forward-looking statements reflect our good-faith beliefs, they are not guarantees of future performance. All forward-looking statements are necessarily only estimates of future results. Accordingly, actual results may differ materially from those expressed in or contemplated by the particular forward-looking statement, and, therefore, you are cautioned not to place undue reliance on such statements. Further, any forward-looking statement speaks only as of the date on which it is made, and we undertake no obligation to update any forward-looking statement to reflect events or circumstances after the date on which the statement is made or to reflect the occurrence of unanticipated events or circumstances, except as required by applicable law. For a discussion of such risks and uncertainties, which could cause actual results to differ from those contained in the forwardlooking statements, see "Risk Factors" and the forward-looking statement disclosure contained in Triumph's Annual Report on Form 10-K, filed with the Securities and Exchange Commission on February 11, 2020.

1) Triumph uses certain non-GAAP financial measures to provide meaningful supplemental information regarding Triumph's operational performance and to enhance investors' overall understanding of such financial performance. The non-GAAP measures used by Triumph include the following:

- "Adjusted diluted earnings per common share" is defined as adjusted net income available to common stockholders divided by adjusted weighted average diluted common shares outstanding. Excluded from net income available to common stockholders are material gains and expenses related to merger and acquisition-related activities, including divestitures, net of tax. In our judgment, the adjustments made to net income available to common stockholders allow management and investors to better assess our performance in relation to our core net income by removing the volatility associated with certain acquisition-related items and other discrete items that are unrelated to our core business. Weighted average diluted common shares outstanding are adjusted as a result of changes in their dilutive properties given the gain and expense adjustments described herein.
- "Tangible common stockholders' equity" is defined as common stockholders' equity less goodwill and other intangible assets.
- "Total tangible assets" is defined as total assets less goodwill and other intangible assets.
- "Tangible book value per share" is defined as tangible common stockholders' equity divided by total common shares outstanding. This measure is important to investors interested in changes from period-to-period in book value per share exclusive of changes in intangible assets.
- "Tangible common stockholders' equity ratio" is defined as the ratio of tangible common stockholders' equity divided by total tangible assets. We believe that this measure is important to many investors in the marketplace who are interested in relative changes from period-to period in common equity and total assets, each exclusive of changes in intangible assets.
- "Return on Average Tangible Common Equity" is defined as net income available to common stockholders divided by average tangible common stockholders' equity.
- "Adjusted efficiency ratio" is defined as non-interest expenses divided by our operating revenue, which is equal to net interest income plus non-interest income. Also excluded are material gains and expenses related to merger and acquisition-related activities, including divestitures. In our judgment, the adjustments made to operating revenue and non-interest expense allow management and investors to better assess our performance in relation to our core operating revenue by removing the volatility associated with certain acquisition-related items and other discrete items that are unrelated to our core business.
- "Adjusted net non-interest expense to average total assets" is defined as non-interest expenses net of non-interest income divided by total average assets. Excluded are material gains and expenses related to merger and acquisition-related activities, including divestitures. This metric is used by our management to better assess our operating efficiency.
